CALGON is a licensed trade name.

For Removing Silt and Sediment Down to 5 Microns

Directions for Installation/Replacing Cartridges

Turn off the water supply to the NP24DD unit. Press the red pressure relief button to relieve pressure and unscrew bowl counter clockwise. Discard old cartridge. The "O" ring in the housing should be inspected and lubricated as necessary. Remove outside wrapper from the new cartridge and install into bowl. Under normal circumstances, treatment will last six months. Make a notation of installation date.

"Do not use with water that is microbiologically unsafe or of unknown quality without adequate disinfection before or after the system."

This cartridge is tested and Certified to NSF Standard 42 for material requirements only.

Made in U.S.A.
